	Test Name	Unit	Reference Range	Low	Normal	High
	Casts (Urine UR, Fluorescence Flow Cytometry)		Absent		Absent	
	Amorphous Deposit (Urine UR, Microscopy)		Absent		Absent	

Interpretation:

1. Test is done on Automated Urine analyzer Sysmex UC - 3500 (Reflectance photometry) & UF – 5000 (Fluorescence Flow cytometry)
2. Trace proteinuria can be seen with many physiological conditions like prolonged recumbency, exercise, high protein diet etc.
3. Negative nitrite test result does not exclude the presence of bacteria or urinary tract infection.
4. Physiological variations may affect the test results.
5. Clinical correlation is required.
6. Reference ranges & clinical information/interpretations are traceable to Kit insert/text book /defined guidelines.
