DEPARTMENT OF LABORATORY MEDICINE - IMMUNOLOGY

	Test Name	Unit	Reference Range	Low	Normal	High
	NT pro B-type Natriuretic Peptide [NT pro BNP] (Serum, Electrochemiluminescence)	pg /mL	0-125			1761.00

NT pro BNP:

1. B-type natriuretic peptide regulates blood pressure and fluid balance; is released in response to ventricle volume expansion and/or pressure overload and is a marker of atrial and ventricular distension.
2. Concentrations increase with the severity of congestive heart failure. Lack of NT-proBNP elevations have been reported if congestive heart failure is very acute or occurs with ventricular inflow obstruction.
3. Reported results are for the information of the referring Clinician. Results should be interpreted in correlation with medical history, clinical presentation and other findings.
4. Reference ranges and clinical information/interpretations are traceable to kit inserts/textbooks/defined guidelines
