DEPARTMENT OF LABORATORY MEDICINE - BIOCHEMISTRY

	Test Name	Unit	Reference Range	Low	Normal	High
	Potassium (Serum, Ion-selective electrode)	mmol/L	3.5-5.1		3.78	

Potassium:

- Potassium:** is the major intracellular cation and is critical to neural and muscle cell activity. Some causes of decreased potassium levels include reduced intake of dietary potassium or excessive loss of potassium from the body due to diarrhea, prolonged vomiting or increased renal excretion. Increased potassium levels may be caused by dehydration or shock, severe burns, diabetic ketoacidosis, and retention of potassium by the kidney.

DR. KSHAMA PIMPALGAONKAR
M D Biochemistry
Consultant Biochemist

DR. SRIKANT GHARPURE
M.D, DPB, DCP (London)
Consultant Pathologist
