DEPARTMENT OF LABORATORY MEDICINE - IMMUNOLOGY

Anti Nuclear Antibody (ANA)

ANA Result
(Serum, Immunofluorescence)

Positive

Negative

Pattern
(Serum)

Nucleoplasm
granular

Titre
(Serum)

1:320

ANA Test Interpretation:

1. Sample screening dilution is 1:100.
2. Negative result indicates that there is no detectable level of antinuclear antibodies.
3. Trace positive result needs to be correlated clinically; repeat test after 6 weeks; further testing for detection of specific antigens / autoantibodies can be done.
4. Positive result needs to be correlated clinically; further testing for detection of specific antigens / autoantibodies can be done.
5. Immunofluorescence pattern can indicate the antigen type and its clinical association.

ANA Clinical Information:

1. Antinuclear antibody test is a sensitive screening test used to detect presence of autoantibodies which occur in a variety of autoimmune diseases, both systemic and organ-specific. The diagnosis is based primarily on the presence of compatible clinical signs and symptoms.
2. The assay results for autoantibodies are ancillary hence therapeutic decision, disease activity or response to treatment based solely on the result values are not generally recommended.
3. Reported results are for the information of the referring Clinician. Results should be interpreted in correlation with medical history, clinical presentation and other findings.
4. Reference ranges and clinical information/interpretations are traceable to kit inserts/textbooks/defined guidelines.

DEPARTMENT OF LABORATORY MEDICINE - IMMUNOLOGY

Test Name Result Units Biological Reference Range

Antibodies against	Disease	Prevalence
Ribosomal P-proteins	Systemic lupus erythematosus	5% - 46%
nRNP/Sm	Sharp syndrome	95% - 100%
nRNP/Sm	Systemic lupus erythematosus	3% - 47%
nRNP/Sm	Systemic sclerosis	2% - 14%
nRNP/Sm	Polymyositis/Dermatomyositis	12% - 16%
nRNP/Sm	Overlapping polymyositis/Systemic sclerosis	approx. 24%
Sm	Systemic lupus erythematosus	5% - 40%
SS-A (Ro)	Sjögren's syndrome	40% - 95%
SS-A (Ro)	Systemic lupus erythematosus	20% - 60%
SS-A (Ro)	Neonatal lupus erythematosus	95% - 100%
SS-B (La)	Sjögren's syndrome	40% - 95%
SS-B (La)	Systemic lupus erythematosus	5% - 35%
SS-B (La)	Neonatal lupus erythematosus	75% - 80%
Scl-70	Systemic sclerosis - limited form or diffuse form	5% - 30% or 25% - 75%
Jo-1	Polymyositis/Dermatomyositis	18% - 30%
Centromeres	Systemic sclerosis - limited form or diffuse form	80-95% or approx. 8%
	Primary biliary cirrhosis	15% - 30%
