

Name : **Saroj Agarwal** Age/Gender : 63 y / F Collected : 28/03/2026 04:31
Patient ID : **0010663186** Visit Type : IP Received : 28/03/2026 06:33
Referred By : Dr. Darshit Shah DOB : 27/08/1962 Reported : 28/03/2026 08:44
Accession : 2600068372 Location : 1T13S`1TR1322`1TB1322`1ONCOMED

DEPARTMENT OF LABORATORY MEDICINE - HAEMATOLOGY

	Test Name	Unit	Reference Range	Low	Normal	High
	Coagulation Profile					
	Fibrinogen (Citrate Plasma, Clauss Method)					
	Fibrinogen	mg/dl	200-400		331.00	

Test performed on Fully Automated Coagulometer.

Fibrinogen:

Fibrinogen is a blood plasma protein that is produced in the liver and is responsible for normal blood clotting.

Fibrinogen is an acute phase reactant.

High levels of fibrinogen are associated with an increased risk for cardiovascular disease.

Increased levels are also found during pregnancy, oral contraceptive use, inflammatory disorders (like rheumatoid arthritis and glomerulonephritis), trauma, acute infections and certain cancers.

Acutely low levels are seen in:

- DIC
- Abnormal Fibrinolysis
- Rapid, large volume blood transfusions

Chronically low levels are seen in:

- Inherited conditions - afibrinogenemia hypofibrinogenemia
- Acquired conditions - End stage liver disease, severe malnutrition
