

Name	: Saroj Agarwal	Patient ID	: 0010663186
Date of Birth	: 27-08-1962	Age/Sex	: 63 Years/F
Performing Date	: 07-04-2026 12:22 PM	Order No.	: 0041467736
Referred By	: Shah Darshit	Report Date	: 08-04-2026 11:47 AM
Study Description	: X-RAY Barium Swallow		

Clinical details: Post vocal cord lateralisation.

Observation:

There was free flow of barium from the oral cavity to the stomach.

A thin rim of barium was seen into the right trachea-bronchial tree, suggestive of aspiration.

The pyriform sinuses and the valleculae are normal.

A thin streak of barium was seen into the right tracheobronchial tree, suggestive of aspiration.

There is no evidence of an oesophageal stricture.

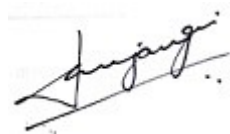

No abnormal filling defects are seen in the oesophagus.

The gastro-esophageal junction is normal.

Impression:

A thin streak of barium is seen into the right tracheo-bronchial tree- suggestive of aspiration.

Incidental note is made of patchy consolidates in the right upper zone and both midzones.
