

Name : **Saroj Agarwal** Age/Gender : 63 y / F Collected : 26/03/2026 01:57
Patient ID : **0010663186** Visit Type : IP Received : 26/03/2026 03:51
Referred By : Dr. Darshit Shah DOB : 27/08/1962 Reported : 26/03/2026 08:44
Accession : 2600066738 Location : 1T13S`1TR1322`1TB1322`1ONCOMED

DEPARTMENT OF LABORATORY MEDICINE - BIOCHEMISTRY

	Test Name	Unit	Reference Range	Low	Normal	High
	C-Reactive Protein [CRP] (Serum, Immunoturbidimetric)	mg/dL	< 0.5			2.04

CRP:

C-reactive protein (CRP) is one of the most sensitive acute-phase reactants for inflammation. CRP elevations are nonspecific and may be useful for the detection of systemic inflammatory processes; to assess treatment of bacterial infections with antibiotics; to detect intrauterine infections with concomitant premature amniorrhexis; to differentiate between active and inactive forms of disease with concurrent infection; to therapeutically monitor rheumatic disease and assess anti-inflammatory therapy; to determine the presence of postoperative complications at an early stage and to distinguish between infection and bone marrow rejection.

DR. KSHAMA PIMPALGAONKAR
M D Biochemistry
Consultant Biochemist
